## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

No prior art has been found teaching or suggesting an array of polynucleotides in that the closely packed planar array has either a number of microparticles per unit area that is at least eighty percent of the number of microparticles in a hexagonal array of equal area and a plurality of different polynucleotides attached to the microparticles such that each different polynucleotide is attached to a different microparticle. The closest prior art is the reference of Dower et al.. Dower et al. disclose a method for synthesizing random oligomers on particles (See the Abstract) and the synthesis of peptides on 96 plastic pins which fit the format of standard microtiter plates (See column 2, lines 36-38) and the oligomer on the solid support can be nucleic acid (See column 2, line 50-53). This suggests that the 96 plastic pins which fit the format of standard microtiter plates are planar array. However, the 96 plastic pins do not have the features of the planar array as claimed in claim 24.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
